SUMMARY

Enthusiastic Full Stack Developer with 1.5 years of experience in Mobile and Web Apps Development field (purely JavaScript and frameworks). Looking forward to apply my core-CS knowledge to make work more exciting and evolve as a professional.

EXPERIENCE

MORFSYS | Full Stack Developer (Web and Mobile Apps)
July 2019 - Present | Mumbai, Maharashtra
- Increased company's net revenue by 21-22% within 9 months.
- Managed additional workload efficiently, it ensured increased bandwidth for the very first in-house product of the company.
- Developed a Alexa/Google Assistant skill for an Insurance Company that gives users a No UI experience along with a dashboard and back-end on MEAN Stack for analytics of the skill.
- Developed a web app/back-end on MEAN Stack and mobile app using React Native which have features like location mapping and live tracking with multi language support.
- Developed an app for Co-Living Company for Tenants. It led to quick settlement of dues and payments along with an organised record plus great user experience and multiple benefits.
- Developed Live News App for client using Ionic and Google Firestore which helped them make profit of around Rs. 2000/day.
- Developed a Quora like mobile application using React Native for a particular Indian language along with the back-office and back-end on MEAN Stack.
- Skills learned:
- Vanilla JavaScript
- ReactJS
- React Native
- ExpressJS
- NodeJS

BERRYCODERS | Intern + Junior Developer
Sept 2017 – Nov 2018 | Mumbai, Maharashtra
- Digitised entire record entry system of a factory which was a manual paperwork process. It resulted into **2x** efficiency.
- Developed entire system within 2 months using HTML/CSS/Bootstrap/JavaScript/PHP.
- Developed a Hybrid Mobile Application using Ionic and web application from scratch using Angular 4 framework within 4 months. It lead to increased audience reach for the client's business and more profit.
- Skills learned:
- Angular 4
- HTML
- CSS
- JavaScript
- Ionic Framework
- PHP
